

Project 1

How to make a card frame
An adult should always supervise and help because of the danger when using sharp cutting tools

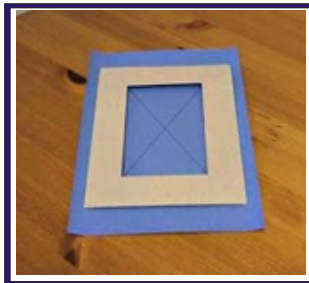

Materials:

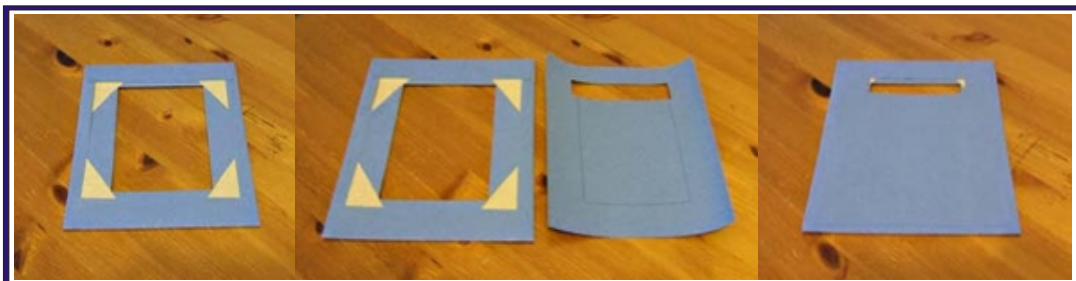

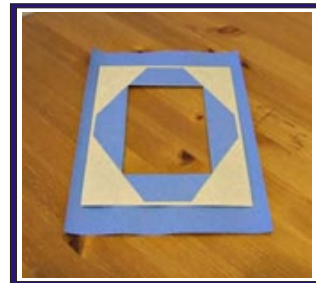

- toilet roll
- card from cereal boxes
- ruler, pencil
- scissors and glue
- paper for decoration (we used colour paper, but you can also use magazine paper and make your own collage)

1. Cut the frame to the size of your picture

2. We need to cover the frame with paper. Cut two lines from corner to corner inside the frame. Fold the paper out and glue it to the card.

3. Glue the paper edges as well. Next cut a piece to cover the back of your frame. On the top cut wide enough so your picture will go through. Now you can use some glue to fix it on the back of your frame. When applying the glue, put it only on the left, right and bottom sides.

4. Glue the toilet roll on the back of your frame
Now your frame is ready to be decorated.
You can cut letters and other things and do a collage
